*We aren't affiliated with Van's, but none of us would be doing this had they not built such an amazing line of kits. Many of us, including me, are currently flying one of their models. I have an RV-4.*

*Many of you may find it useful to know that Van's is providing digital plans for their aircraft. The info below is copied directly from Van's recent email newsletter.*

**Create Your Account on the Van's Aircraft Online Store**

Have you visited the [Van's Web Store](#) in the past year? If not, be sure to take a look! You can create your very own login account on the store, which will allow you to get the most benefit and all of the store's capabilities! You'll be able to save items for future purchase, securely store payment information, and more. RV kit/aircraft owners who set up their store accounts can also connect their aircraft/kit serial numbers with their accounts. After doing so you'll gain electronic access to the most recent builder plans for your airplane model. [Give it a try!](#)

---

## Shop progress:

Things are still moving painfully slowly. The house, garage, and shop buildings are finally framed and now have concrete floors. HVAC and other systems are underway. We hope to be moved in by 4Q22 and have some *limited* Rocket activity again by 1Q23. Fingers crossed.
